Supply and Logistics AmeriCorps Member Position Overview:

Our ability to continue to bring families home relies heavily on the dedication of our AmeriCorps members. The position of Supply & Logistics Coordinator serves as the backbone of SBP's construction department, providing disaster-impacted sites with the necessary tools and materials on time and accurately. Responsibilities include efficiently procuring materials, preparing and delivering orders, and scheduling pick-ups for each job site with a keen focus on accuracy. As a Supply and Logistics Coordinator, you work closely with vendors to procure necessary materials and track weekly inventory of these materials. The impact these members have on the lives of our homeowners is necessary as they are responsible for the prompt delivery of rebuilding materials throughout these disaster impacted areas.

Working closely with SBP's construction department, Supply & Logistics Coordinators determine the need for the rebuild process, organizing and maintaining tools and tracking their location. As a member of the warehouse team, these members focus on keeping the warehouse clean and safe while constantly creating and refining processes.

Supply & Logistics Coordinators ensure that SBP is represented in a positive and professional manner by completing each project on time and on schedule, interacting positively with colleagues, maintaining tools and focusing on safety in the warehouse and at each job site. Members who have served in this position are trained by the Toyota Production System which has allowed them to pursue careers in warehouse management, supply chain management and project management positions.
