

Texas Conservation Corps Asian and Pacific Islander Crew

Explore a Career in Environmental Conservation and Stewardship

American YouthWorks' Texas Conservation Corps (TXCC) is recruiting API (Asian and Pacific Islander) young adults 18 to 35 years old for a Summer 2024 AmeriCorps term of service.

The API 2024 Summer crew aims to make environmental careers more accessible for API young adults.

Crew members will learn to address environmental issues through the completion of on-site, skills-based projects on public lands. They will have opportunities to explore careers in conservation work.

If you are interested in engaging in hands-on environmental conservation and stewardship, education, and professional development while receiving a living stipend and an education award, please contact us!
